

AeroSpace and Defence
Industries Association of Europe

A collage of four images representing different sectors of the aerospace and defense industry. The top-left image shows a commercial airplane flying over a city. The top-right image shows a rocket launching with a large plume of smoke. The bottom-left image shows a naval ship at sea. The bottom-right image shows a military tank on a road.

ASD organisation in support to data interoperability

**ASD-AIA collaboration call,
25 November 2019**

Yves Baudier
ASD SSG Chair

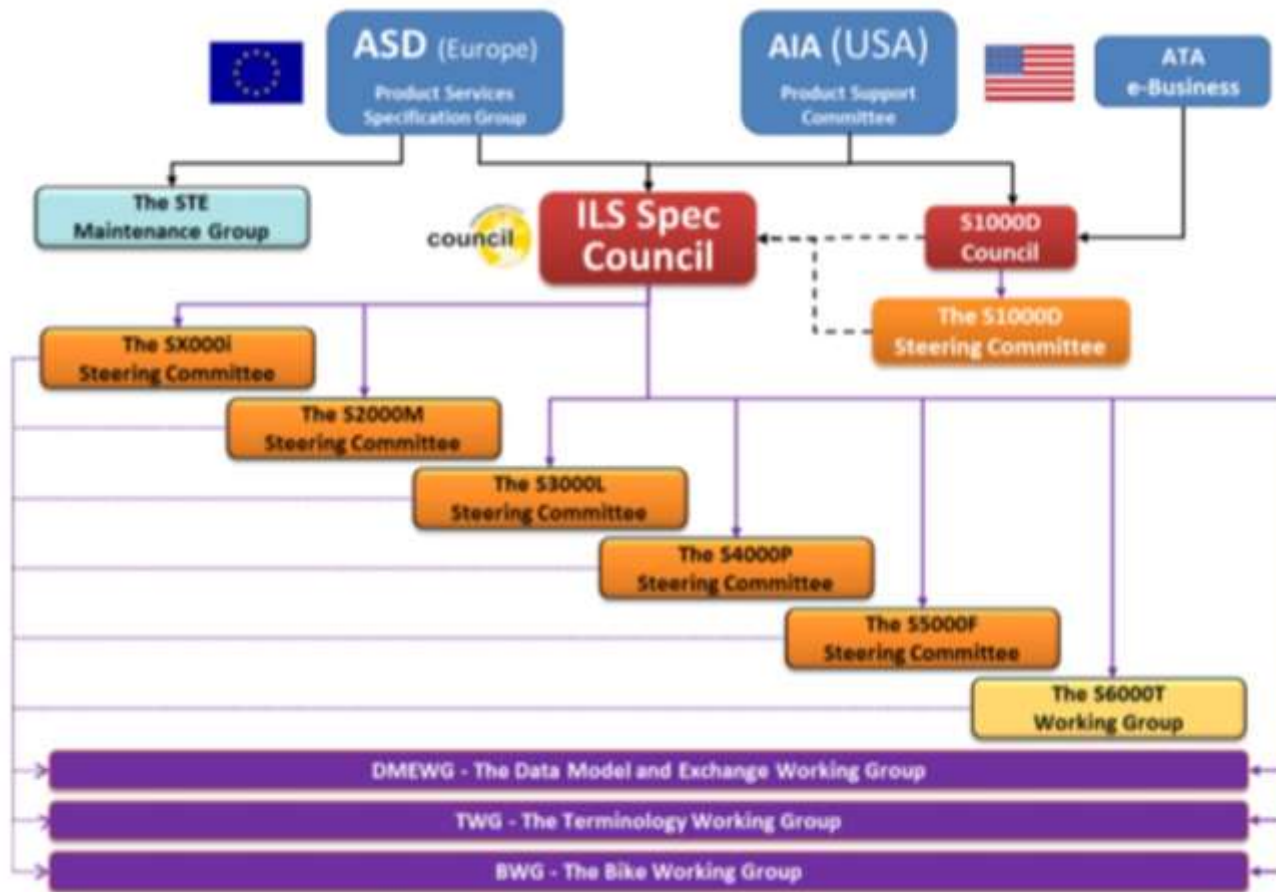

Overall organisation

ASD-AIS MoU #1: Product Support Domain

Focus on the shared development of Product Support specifications

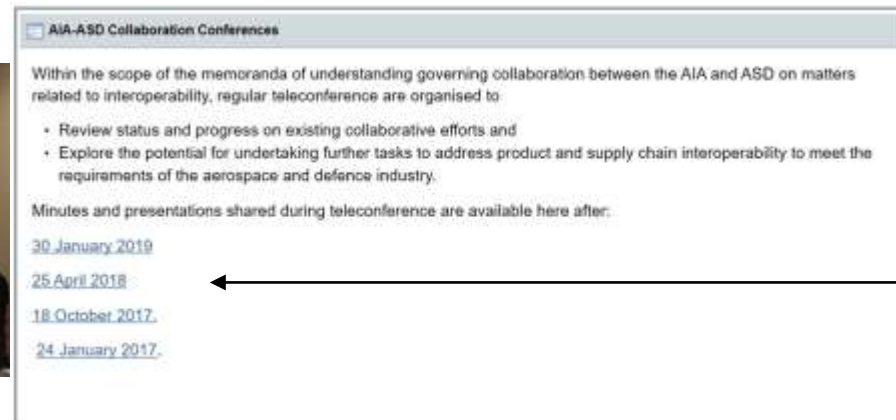

ASD-AIS MoU #2: Governance for Data Interoperability

Focus on collaboration to achieve a coherent set of standards for A&D Industry and their effective interoperability

MoU extract:

“In order to **promote common, interoperable, electronic business solutions** in the aerospace and defence industries of Europe and the United States and their supply network, and to make optimal use of the resources available, ASD and AIA agree **to work in concert on the joint identification and development of standards to support such solutions**”

ASD SSG page dedicated to this MoU: <http://www.asd-ssg.org/collaboration-with-aia>

website

ASD SSG organisation and activities

Activities:

- Develop a data interoperability strategy for ASD industry: [Through Lifecycle Interoperability Report](#)
- Analyse standardisation landscape: [Radar](#)
- Develop roadmaps per domain: [Working groups](#)
- Initiate and follow [contributing projects](#)
- Develop [ASD recommendations/statements](#)
- Communicate on strategy and progress: [Newsletters](#)

Three 2-day meetings per year – [Dates](#), [Minutes](#)
Monthly conference calls

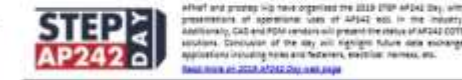

Organisation: [Board](#), [Members](#) and [Additional participants](#)
